74. **Environment** 03/11/2009

A discussion between Hannah, Stephen, Rebecca, Jemima.

Provenance du document:

<http://www.podcastsinenglish.com/index.htm>

Public visé : B2

Mes objectifs :

Micro-trottoir : Questionnement et réponses sur le respect de l'environnement. Expression orale. Vocabulaire nouveau à fournir à la demande.

Compréhension orale: repérage d'informations diverses, avec structures linguistiques, intonation des questions, lexique

Réactivation par la suite avec l'**expression orale** en interaction.

Expression écrite : Etablir une liste d'engagements pour la protection de l'environnement (utilisation des modaux et du futur, formes affirmative et négative)

I Listen to the document and find the answers:

1- Write the two countries mentioned :

.....

2- The group of friends are talking about :

- food health cars pollution bins
- crash hobbies love school water

3- Write the things they recycle :

.....,,,

Intonation

Listen to the questions. Write if the intonation is rising ↗ or going down ↘

1. Would you say that you're environmentally conscious ?
2. Is that wrong ?
3. Is it very important ?
4. Do most people recycle ?

Find an expression to translate : "environmentally conscious" :

.....

Fill in the blanks with the missing words or expressions :

- I always recycle at my and so I put my
Aside and then I go and it in the of else.
- I think so. I think most come around to
..... recycling from house.
- You also have to That different have different
..... On the environment, for example, California is very
.....
You find the trucks of Texas in California. You're
more to find cars and things like that.

Vocabulary

organic	lorries
garbage	biological
trucks	trash
carbon emissions	problems
issues	pollution

Try to copy the English saying (the last expression) :

.....

Homework : Prepare a list of measures you could take to protect the environment. (use the modals : CAN, CAN'T, COULD, WILL, WON'T, SHOULD, IT'S (NOT) NECESSARY.

SPEAK!

Prepare a vox pop (micro trottoir) with your friend.

Pupil A: You are the journalist and ask questions about your partner's environmental habits , (look out for the intonation). Get ready to react to the answers.

Pupil B: You are the passer-by and you answer the journalist's questions. Try to be honest and convincing.

Script of the interview :

- Would you say that you're environmentally conscious ?
- Yes, I'd say I was but only for the points of recycling, you know, cans and cardboard and paper.
- Well, that's very good.
- Yeah
- I can't always recycle at my house and so I put my recycling aside and then I go and put it in the bin of someone's else. Is that wrong ?
- No, you're recycling !
- I'm recycling. That's what I think.
- OK. And what about in England ? Is it very important ? Do most people recycle ?
- I think so. I think most town councils come around to collect recycling from each house.
- You're given different bins for different types of rubbish.
- It's namely just paper and plastic bottles.
- Sure, I guess the whole world has become more environmentally conscious. There are so many things organic and recycling.
- I mean, we are recycling but we are still creating the trash in the first place.
- Well, it's true.
- So that's...there is something to work at.
- In America, do you feel now with Obama that there'll be more changes with the environment ?
- Well I hope.
- It's not necessary they're going to be striking because it's about everybody participating and you also have to consider that different States have different views on the environment, for example California is very environmentally conscious. You won't find the big trucks of Texas in California. You're more likely to find ecological cars and things like that. So there's differences between the States because it's a great big country.
- danger hoping that Obama will work with other countries on environmental issues.
- Sure
- and work toward international cooperation..
- sure, that's important.
- Which is a definite new direction to be going.
- I know the European Union are doing a lot at the moment to work, to try and reduce carbon emissions and particularly restricting big cars because I know perhaps more a problem in America are families driving very big cars.
- The big trucks
- The big trucks.
- Gas guzzler, we call them, gas guzzler.
- Yes, it's true.
- Me, I don't have a truck but some people seem to like them.
- Well, that's good. I'm glad that we all try to do our part. And every little thing helps.
- Definitely.
